

VIVA COLLEGE SCHOOL HOLIDAY INTERVENTION FACULTY OF SCIENCE

SENIOR ONE

FACULTY OF SCIENCE

1. Suggest ways the knowledge of science in each of the following subjects can be used to overcome the corona-virus pandemic
 - i. Chemistry
 - ii. Biology
 - iii. Physics
2. Research (using internet or books) and produce a write up on the properties of states of matter (solids, gases, liquids).

(hint: write about the shape, volume, density, ease of flow and arrangement of particles for each state of matter)

3. Find out and outline the
 - (i) Signs and symptoms of a person infected with corona virus
 - (ii) The precautions you need to give to your family members to avoid getting the corona virus infection.

AGRIC

1. In what ways has the corona virus epidemic affected Agricultural production in Uganda?
2. Explain the term commercial farming and give reasons why Ugandan famers should be practicing it.
